WHAT IS THIS PRODUCT?

Type : The Company is an open-ended investment company incorporated with limited liability and registered in England and Wales. The Company qualifies as UK UCITS (Undertaking for Collective Investment in Transferable Securities) as defined in the FCA Glossary.
Term : This product has no maturity date. However, the manufacturer may decide to close the product under certain circumstances.
Objectives :

- The aim of the Fund is to achieve capital growth over 5 years and contribute to positive sustainability impact over this period.
- Positive sustainability impact includes:

supporting a stable climate and healthy ecosystems through activities that: a) deliver Cleaner Energy and avoid the production of greenhouse gases; b) provide Environmental Services that reduce the generation of waste and avoid the production of greenhouse gases; c) enable improved Resource Efficiency in order to avoid the production of greenhouse gases; d) enable Sustainable Transport that avoids the production of greenhouse gases; e) enable effective Water Management through reductions in the use of freshwater and treatment of polluted water;

and enabling more productive and healthy lives through activities that: f) deliver more Education; g) deliver improved Health through the reduction of both communicable and non-communicable diseases; h) improve Safety by making sure products are safe and by directly protecting people from hazards; i) improve Well-being for people through preventative care; and j) deliver new and better positive impact technologies related to the above activities.

- The Fund will both invest and support, through the manager's investment activities, at least 80% of its assets in shares of companies anywhere in the world in sectors identified as providing solutions to sustainability challenges that align with the Fund's positive sustainability impact. There is no predetermined focus on business sector, geography or markets, although concentrations will naturally emerge through stock selection.

- Under normal circumstances, the Fund will hold cash on deposit up to 10% of the value of the Fund.

- The Fund may also invest in other transferable securities (such as shares, debentures, government and public securities and warrants), funds, money market instruments* and near cash (which are non-cash assets that are highly liquid and easily converted to cash, such as savings accounts, certificates of deposit and treasury bills). These investments will not be made in pursuit of the sustainability objective but also will not be in conflict with the sustainability objective.

- The Fund may use derivatives (contracts where the value is linked to the expected future price movements of an underlying asset) for efficient portfolio management.

- Target companies will be listed on or dealt in a Regulated Market.

- Distribution Policy: If you hold accumulation shares, income from investments in the Fund will be rolled up into the capital assets of the Fund.

- The Sub-Fund launched on 24 May 2009. The Share Class launched on 18 December 2017.

- The currency of the Fund is GBP, the currency of this product is USD.

Intended retail investor : The Company is offered to investors who may have basic or no knowledge and experience of investing in financial markets and also experienced investors and is intended for long-term investment. Investors should understand the risks involved, including the risk of losing all capital invested and must evaluate the Company's objective and risks in terms of whether they are consistent with their own investment goals and risk tolerances.

Depository: Citibank UK Limited.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

Lower risk

Higher risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

For details of the Fund's risk please see the Prospectus or the Key Investor Information Document which is available from the ACD.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 5 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: 5 years Example Investment: 10,000 USD			
Scenarios		If you exit after 1 year	If you exit after 5 years (RHP)
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

	Average return each year	-68.05%	-22.75%
Unfavourable	What you might get back after costs	6,840 USD	7,830 USD
	Average return each year	-31.57%	-4.77%
Moderate	What you might get back after costs	10,740 USD	12,970 USD
	Average return each year	7.36%	5.34%
Favourable	What you might get back after costs	15,720 USD	19,520 USD
	Average return each year	57.21%	14.31%

Unfavourable scenario: This type of scenario occurred for an investment/benchmark or proxy between August 2021 and February 2025

Moderate scenario: This type of scenario occurred for an investment/benchmark or proxy between July 2017 and July 2022

Favourable scenario: This type of scenario occurred for an investment/benchmark or proxy between October 2016 and October 2021

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

WHAT HAPPENS IF FUNDROCK PARTNERS LIMITED IS UNABLE TO PAY OUT ?

The Authorised Corporate Director ("ACD") is responsible for administration and management of the Fund, and does not typically hold assets of the Fund (assets that can be held by a depositary are, in line with applicable regulations, held with a depositary in its custody network). The ACD, as the PRIIPs manufacturer has no obligation to pay out since the product design does not contemplate any such payment being made. However, investors may suffer loss if the Fund or the depositary is unable to pay out. There is no compensation or guarantee scheme in place which may offset all or any of this loss.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Cost over time

The tables below show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return).
- For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- 10,000 USD is invested.

Example Investment: 10,000 USD	If you exit after 1 year	If you exit after 5 years (RHP)
Total costs	116 USD	772 USD
Annual cost impact(*)	1.16%	1.23%

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.57% before costs and 5.34% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
